

## Equine Vaccination Protocol – Border Union Show 2019

### **Horses competing at Border Union Show 2019**

No horse may take part in any competition, unless it has a current vaccination against equine influenza which complies with the following conditions:

- Two injections for primary vaccination, not less than 21 days and not more than 92 days apart, are required before being eligible to compete;
- A first booster injection must be given not less than 150 days and not more than 215 days after the second component of the primary vaccination;
- Subsequent booster injections must be given at intervals of not more than one year, commencing after the first booster injection;
- The most recent booster injection must have been given within the six calendar months prior to the horse arriving at the competition.

None of the vaccinations must have been given on the day of competition or on any of the 6 days before the competition.

### **Horses Stabling at Kelso Racecourse**

No horse may enter any BHA stables or restricted areas, unless it has a current vaccination against equine influenza which complies with the following conditions:

- Two injections for primary vaccination, not less than 21 days and not more than 92 days apart, are required before being eligible to compete;
- A first booster injection must be given not less than 150 days and not more than 215 days after the second component of the primary vaccination;
- Subsequent booster injections must be given at intervals of not more than one year, commencing after the first booster injection;
- The most recent booster injection must have been given within the nine calendar months prior to the horse arriving at the competition.

None of the vaccinations must have been given on the day of the event in which the horse is declared to compete or on any of the 6 days before the event.
